# Afia Analytics

Afia Analytics goes beyond dashboards to create business intelligence. Increased revenue. Improved processes. Empowered staff.

## Advanced Financial Analytics Package

### Data Warehouse and BI Dashboards

Financial data is extracted from your source systems, namely the EHR and the General Ledger, to enhance the data warehouse. Flexible views are provided of key financial reports, including income statements, balance sheets, and budgets. Financial metrics, including revenue cycle management metrics, budget comparisons, and financial ratios are viewable with easy-to-use dashboards, complete with powerful drill-down and filtering capabilities

### Meaningful Financial Dashboards

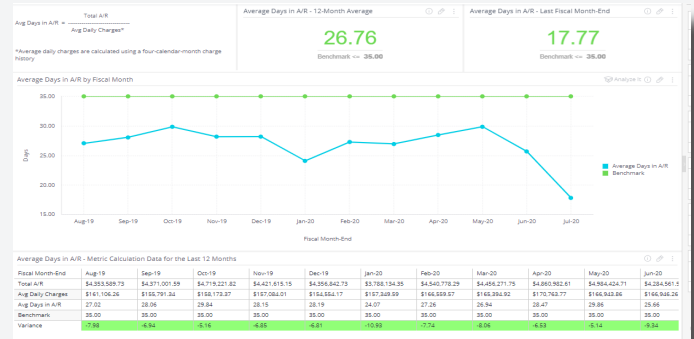

The Afia Analytics business intelligence platform provides your agency access to meaningful metrics that can be used to monitor and drive business. Key staff from the CEO and CFO to Program Managers can monitor real-time charge data and summary financials. Financial metrics include net collection rate, days in accounts receivable, percent of A/R greater than 120 days, denial rate upon first claim submission, charge collection trends, charge lag, budget to actuals, current ratio, quick ratio, net profit margin, debt-to-equity ratio.

### Monitoring and Optimization

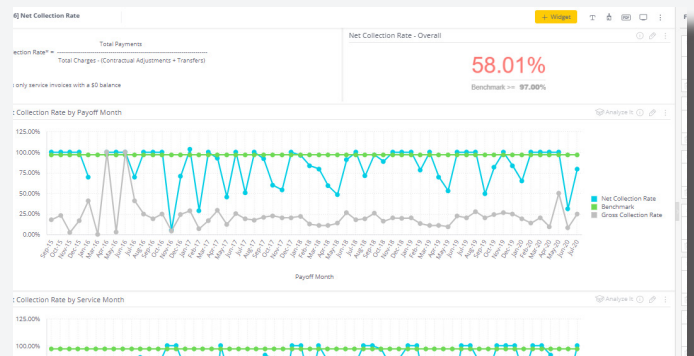

Afia Analytics is built to be fully scalable to support all of your key clinical, financial, and operational indicators. Once your initial project is complete, our team of experts will work with you to ensure that data drives better performance in support of your strategic goals. This will include historical trending of financial metrics and access to Afia Analytics Community Resources.

## Sample Financial Metric Dashboards

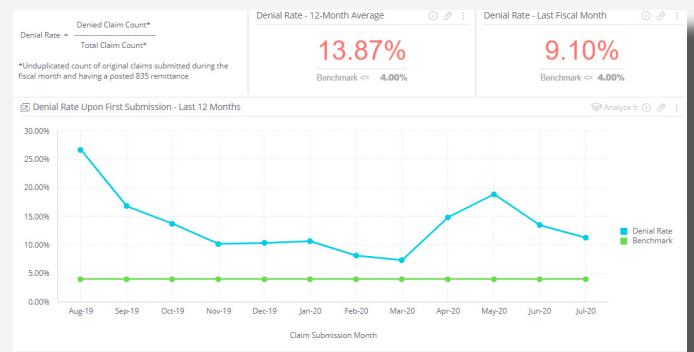

### Average Days in A/R

### Net Collection Rate
